# YOU CAN DO IT WITHOUT LANCETS\*

Anytime,<sup>†</sup> anywhere<sup>‡</sup>

Imagine the freedom of the FreeStyle Libre system

The FreeStyle Libre flash glucose monitoring system is indicated for measuring interstitial fluid glucose levels in adults aged 18 years and older with diabetes mellitus. Always read and follow the label/insert.

# Free yourself from the pain and hassle of traditional blood glucose testing<sup>1</sup>

FreeStyle  
**Libre**  
FLASH GLUCOSE MONITORING SYSTEM

Scan the sensor with the FreeStyle LibreLink app on your phone or your FreeStyle Libre reader.<sup>§</sup> Anytime,<sup>†</sup> anywhere.<sup>‡</sup>

- A Current glucose**  
gives you an accurate glucose reading
- B Glucose trend arrow**  
shows you where your glucose is heading
- C Glucose graph**  
shows you an 8-hour history of your glucose
- D Glucose message**  
tells you if you're in or out of range

**Small and discreet** - about the size of a loonie and scans through clothing<sup>||</sup>  
**Easy to apply** - comfortable to wear<sup>2</sup> for up to 14 days  
**Water-resistant** - can be worn while bathing, swimming, and exercising<sup>†</sup>

Download the  
**FREE FreeStyle LibreLink app.**<sup>§</sup>

# GETTING STARTED IS AS EASY AS 1-2-3<sup>¶</sup>

- 1** **APPLY** the sensor to the back of the upper arm using the applicator
- 2** **SCAN** the sensor by touching *Scan New Sensor*
- 3** **VIEW** your first glucose reading in just 1 hour

Ask your healthcare professional  
about the FreeStyle Libre system today.  
For additional information, visit

\* Scanning the sensor does not require lancets.

† 60-minute warm-up required when applying the sensor.

‡ Sensor is water-resistant in up to 1 metre (3 feet) of water. Do not immerse longer than 30 minutes. Not to be used above 10,000 feet.

§ The FreeStyle LibreLink app and the FreeStyle Libre reader have similar but not identical features. A finger prick test using a blood glucose meter is required during times of rapidly changing glucose levels when interstitial fluid glucose levels may not accurately reflect blood glucose levels or if hypoglycemia or impending hypoglycemia is reported by the FreeStyle LibreLink app or when symptoms do not match the app readings. The FreeStyle Libre sensor communicates with the FreeStyle Libre reader that started it or the FreeStyle LibreLink app that started it. A sensor started by the FreeStyle Libre reader will also communicate with the FreeStyle LibreLink app. The FreeStyle LibreLink app is only compatible with certain mobile devices and operating systems. Please check the website for more information about device compatibility before using the app. Use of FreeStyle LibreLink requires registration with LibreView.

|| The reader can capture data from the sensor when it is within 1 cm to 4 cm of the sensor.

¶ Refer to package insert/label accompanied with your product for detailed instructions and indication of use.
